CPOF INTEGRATION SYSTEM™

Effortless Connection
Instant Collaboration

The CPOF INTEGRATION SYSTEM™

is an interface and networking system that gives Command Post of the Future Operators the ability to effortlessly interconnect CPOF kits to Command Center Systems.

Operators can push CPOF video feeds at native resolution of 3072x768 to Jupiter, AMX, Crestron, Extron and other major brand controllers for Data Wall displays or network routing along with three return feeds for local monitor viewing.

Unique to this system is the inherent ability to provide full audio integration, microphone, voice, and data terminations.
The CPOF INTEGRATION SYSTEM™

installation manual may be found at…

www.dasnetcorp.com

CPOF Integration System installed in Command Center to readily support Tactical CPOF Operators.

CPOF INTERFACE PANEL embedded to support two (2) simultaneous users or one (1) independent CPOF workstation.
