VPAT Search

Voluntary Product Accessibility Template (VPAT)
The Voluntary Product Accessibility Template, or VPAT, is a tool used to document a product's conformance with the accessibility standards under Section 508 of the Rehabilitation Act. The purpose of the VPAT is to assist Federal contracting officials and other buyers in making preliminary assessments regarding the availability of commercial "Electronic and Information Technology" products and services with features that support accessibility.

Use the drop-down menus to search for VPAT information by product or by keyword or phrase. If you know exactly what you are searching for, you can enter it into the search field.

For additional information and support contact, please contact accessibility@cusa.canon.com.
